Research

Bracing is a proven, effective non-surgical treatment for scoliosis.

Research has shown:

Weinstein et al, Effects of Bracing in Adolescents with Idiopathic Scoliosis, DOI: 10.1056/NEJMoa1307337

Part-time bracing in adult scoliosis cases can improve chronic pain

Weiss et al, Scoliosis bracing and exercise for pain management in adults-a case report, DOI:10.1589/jpts.28.2404

Patients who wear scoliosis braces get better results the longer they wear the brace each day

Weinstein et al, Effects of Bracing in Adolescents with Idiopathic Scoliosis, DOI: 10.1056/NEJMoa1307337

future of bracing

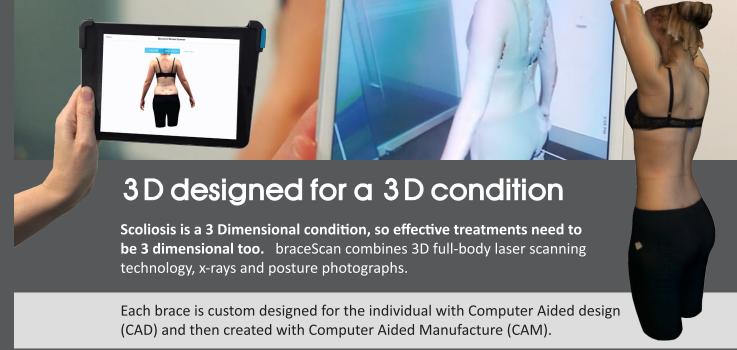

Super Corrective

A ScoliBrace is a super-corrective brace. It works by guiding the body and spine into a posture that is the opposite of how the scoliosis is shaped.

Curve reduction can be achieved in the majority of cases while improving the overall appearance of the body.
